DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Eamon Wall on 16 June 2006.

The application has been amended as follows:

In claim 16, line 16, "the receiver module" has been changed to --- a receiver module --.

Allowable Subject Matter

2. Claims 1-7, 11-20, and 38-52 are allowed.

3. The following is an examiner's statement of reasons for allowance:

Regarding independent claim 1, prior art of record fails to show or reasonably suggest structure for claimed invention taken in its entirety including receiving program data, wherein the program data includes digital broadcast television programs, an address of a scheduling web site, and an authorization code to authorize access to one of the programs, along with receiving EPG data from the received scheduling web site, and sending an order to the scheduling web site for one of the programs via a LAN connection.

Regarding independent claim 16, prior art of record fails to show or reasonably suggest a method for claimed invention taken as a whole, including broadcasting the digital programming and an address of the scheduling website to a receiver module at the set top terminal, wherein the received web site provides an electronic program guide, and receives program orders from a LAN connector, and the scheduling web site sends an authorization to authorize access to one of the programs.

Regarding independent claims 43 and 52, prior art of record fails to show or reasonably suggest a method and corresponding structure for claimed invention taken as a whole including receiving program data from a digital broadcast cable television delivery network, wherein the program data includes broadcast programs, an address of a scheduling web site, and an authorization code to authorize access to one of the programs, along with receiving EPG data from the received scheduling web site, and sending an order to the scheduling web site for one of the programs.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
